

Map of Medicine offers comprehensive, evidence-based local guidance and clinical decision support at the **point of care**. Our solutions support CCGs in transitioning to **integrated care** through pathways and referral management, and aids CCGs in achieving **quality and productivity targets**.

MapPathways

A central repository of evidence-based, local care pathways to help CCGs communicate best practice at the point of care

- Instant access to 260 care pathways at the point of care through GP systems
- Our expert team of GPs, clinical authors and editors maintain best practice pathways in line with NHS England commissioning priorities, so you don't have to
- Proven transformational pathway programme includes clinical engagement, strategy and benefits realisation
- Continuous evidence search of and appraisal of 160 guideline producers, including NICE keeps our content up-to-date and the trusted resource for best practice information
- Independent peer review by Royal Colleges, societies and NHS clinical experts
- Regularly updated pathways made available for local customisation, makes Map Pathways an ideal resource for CCGs
- Map Pathways software gives you the tools to design and publish your own care pathways easily and independently
- GPs can add their own notes to care pathways, and record their usage of pathways to add to their professional development portfolio

MapReferrals

Seamless point of care solution to standardise referral activity across a CCG

- Fully customisable, editable referral guidance and templates can be maintained centrally by a CCG
- Create, approve and cascade locally agreed referral information to GP practices instantly
- Fast-loading fully editable referral forms available at the point of care that can be edited by the GP
- Unique integration within EMIS Web, TPP SystemOne, and INPS Vision allows for one-click auto-population of referral letter templates with patient information & the referral form to be Read-coded back into the clinical system
- Share local pathways and referral guidance across multiple GP systems in a single mouse click so there is no need to maintain system-specific content
- Reporting solution gives you detailed information around cost, usage and referral activity
- Rapid deployment by our team of experts will give a CCG everything needed to successfully get up and running, including training and on-going support from an Account Manager

Track and monitor pathway and referral activity with our unique reporting solutions

Referral dashboard lets you see the **VOLUME AND COST** of referrals

Analyse activity as it happens by **GP, PRACTICE** and **CCG**

Easily track **WHERE** and **WHEN** referrals are being made to your local provider services

Get reports on pathway activity to **MEASURE ADHERENCE** to local care pathways

- Extract data from Map Referrals for use in other business intelligence systems

We're here to support your CCG every step of the way.....

GETTING STARTED

Start maximising the benefits quickly and kick-start your pathway programme with our **consultative services**. We'll help you to create the local care pathways you need, and work with you to train your **local health community**.

CLINICAL PATHWAY TRANSFORMATION

Our proven **'train the trainer'** approach will give you the skills you need to create the best possible **clinical content** for use in primary care, and to engage your local health community. Our team will work with your local information and transform it into **clinically relevant information** for use at the point-of-care.

COMMISSIONING FOR SUCCESS

We know sometimes **'one size fits all'** doesn't always work in commissioning, which is why we have a range of **bespoke services** to help you keep your local information relevant, and up-to-date as national guidance and local protocols change. Our **clinical team** will work with you to **develop a strategy** for your pathway programme tailored to your local priorities.
